

Changing Places Social Story

Changing Places toilets help people with disabilities use public buildings, shops and transport.

Changing Places toilets have:

- a changing table big enough for adults
- hoists
- enough room for the person and their carer to move around
- a non-slip floor
- paper sheets to cover the bench
- a large rubbish bin.

This means people with disabilities have a safe, clean place with everything they need.

This is MK Gallery's Changing Places toilet. The sink height is adjustable and there is a fully accessible shower that people can use if they need to.
